Joe,

EPA <u>concurs</u> that, as evidenced below, WMH has completed construction of a functional storm water diversion structure on the west side above cell #E6 as required by paragraph 19.b. of our AOC of January 25, 2011.

While your progress on the Western Surface Water Drainage Project has met this AOC-required milestone, request that you please continue to provide status updates of the remaining construction work on this project in your daily progress reports.

Also, as I mentioned on the phone yesterday, I will be making a trip to Oahu the week of 7 March to visit a remedial site in the Campbell Industrial Park, and would like to spend either a morning or afternoon inspecting the work at your facility. As my schedule now stands, my visit to the landfill will most likely be on Thursday, 10 March, but I will keep you posted as the time comes nearer so we can coordinate.

## Thanks.

Subject: WGSL Diversion Channel Functionally Complete

Greetings all.

Please be advised that as of today, construction of a functional storm water diversion structure located on the west side above Cell #E6 is complete, per Section 19.6, of the Administrative Order on Consent (AOC) signed on January 25, 2010. I have included supportive pictures for your review. Pictures 1 & 2 depict the diversion wall showing the water pathway into the open channel, picture 3 depicts the bottom of the diversion channel showing the tie in to the in place Hobas pipe. Please contact me if you have any questions.
